

Environment Pillar: Full NSDP Indicator Progress Factsheet

This factsheet provides a comprehensive status update on the 63 total indicators under the Environment Pillar of the National Sustainable Development Plan (NSDP).

Executive Summary

The Environment Pillar is currently facing significant data challenges. Out of the 63 indicators tracked across five goals, the majority are marked with a "Thunderstorm" status, indicating either a lack of progress or a lack of updated data on the national reporting portal.

Global Progress Tracking

- Total Environment Indicators: 63
- Reported Online: 25 (approx. 40%)
- Exploring Data Sources: 38 (approx. 60%)

Full Indicator Tracking

ENV 1: Food Security & Sustainable Production (13 Indicators)

Objective: Increase agricultural and fisheries food production and promote *aelan kaikai*.

ID	Indicator Description	Baseline (H)	Target (I)	Current (J)	Status (N)
1.1.1	Households producing own food	83	100	83	Excellent Progress
1.1.2	Up-to-date primary production data	-	-	-	No data available
1.1.3	Average incidence of household food poverty	5.7	5.6	-	No Progress
1.2.1	National food guidelines (Aelan Kaikai) operational	-	-	-	No data available
1.3.1	Imports of food products produced domestically	211	210	113	Medium progress
1.3.2	Domestic food price level	162.7	TBD	178.5	Medium Progress

1.3.3	Food Price Inflation Rate / Food Price Index	1.084	1.084	1.24	Some Progress
1.4.1	Total FADs per 1,000 population by province	TBD	100 FADS	-	No data available
1.4.2	People trained in food storage/preservation	TBD	Increase by 5%	-	No data available
1.4.3	Land use capability mapping systems established	TBD	100% to provinces	-	No data available
1.5.1	Producers undergone Agro-Met training	TBD	Ag Census infor	-	No data available
1.5.2	Crop diversity index (varieties by province)	TBD	VBoS Assistance	-	No data available
1.5.3	Farmers involved in integrated farming practices	44	50	57	Excellent Progress

ENV 2: Natural Resource Management (11 Indicators)

Objective: Protect and conserve biodiversity, ecosystems, and traditional knowledge.

ID	Indicator Description	Baseline	Target	Current	Status
2.1.1	Proportion of terrestrial & marine conservation areas	Development projects database DSPPAC, Aid Coordination	By 2030 – 100% of new development projects are green infrastructure projects	-	No data available
2.2.1	Number of development projects complying with EIA requirements	85	increase 50 % by 2030	142	Medium Progress
2.2.2	No. of environmental guidelines developed	3	6	5	Excellent progress
2.3.1	The percentage of imported lighting and fridges meeting efficiency standards.	TBD	5% by 2020, 14% by 2030	-	No data available

2.3.2	Proportion of households using renewable energy lighting	23	100	67	Some Progress
2.4.1	Number of controlled wasted disposal facilities	2	>3	-	No Progress
2.4.2	Proportion of vehicles that comply with emission standards	TBD	Vehicle emission standards included in annual roadworthy inspections	-	No data available
2.4.3	The completion rate of the updated National Waste Strategy and Action Plan.	TBD	Targeting 90% completion of the National Waste Strategy.	-	No data available
2.5.1	The completion rate of targets within the 2016–2030 National Environment Plan.	TBD	Full achievement of all 2020 National Environment Policy targets.	-	No data available
2.5.2	Environmental obligations in intl. treaties met	TBD	Integrating 70% of international environmental treaties into corporate planning and reporting.	-	No data available
2.6.1	Proportion of funding requested by DEPC in support of sustainable development approved through NPP/percentage of government expenditure for environmental activities	TBD	Government expenditure for environmental activities has increased by at least 15 million vatu from the 2016 baseline	-	No data available
2.6.2	Amount deposited in the Environmental Trust Fund	TBD	Environmental Trust Fund is operational	-	No data available

ENV 3: Climate Change & Disaster Risk Reduction (14 Indicators)

Objective: Strengthen resilience and adaptive capacity to climate change and natural disasters.

ID	Indicator Description	Baseline	Target	Current	Status
3.1.1	Proportion of government ministries with policies,	TBD	100% of government ministries with policies,	-	No data available

	budgets, and legislation for CC & DRM			budgets and legislation for CC & DRM	
3.1.2	Institutional strengthening of NAB, Department of Climate Change and other MoCC departments	TBD	100% of DoCC and NAB secretariat staff financed by the government	-	No data available
3.1.3	Alignment of sector stakeholders' programs and CC & DRM policies and legislation	TBD	100% of sector stakeholders are aware of CC & DRM policies and legislation	-	No data available
3.2.1	Establishment of multi-hazard warning systems with maintenance plans in place	TBD	100% of provinces with multi-hazard warning systems	-	No data available
3.2.2	Proportion of population with access to technologies that convey early warnings	TBD	0.8	0.6	Some Progress
3.2.3	Increased knowledge and scientific research in atmospheric and earth sciences	TBD	Increase in publications or research proposals in atmospheric and earth sciences	-	No data available
3.3.1	Number of support plans available to communities for coordination, planning, preparedness, response and recovery	TBD	80% of communities have access to support plans	-	No data available
3.3.2	Percentage of climate change and disaster affected communities with durable solutions	TBD	60% of climate change and disaster affected communities with durable solutions	-	No data available
3.3.3	Number of multi-hazard and risk maps to improve Post-Disaster Needs Assessment	TBD	1 national multi-hazard and risk map	50	Excellent Progress
3.4.1	Percentage of public schools using the climate change and disaster risk reduction modules in national curriculum at all levels	TBD	85% of public schools using the climate change and disaster risk reduction modules in national curriculum at all levels	-	No data available
3.4.2	Number of communication and partnership activities and awareness programs	TBD	60% of islands covered by awareness programs targeting climate	-	No data available

	established targeting issues such as climate change adaptation and resilience		change adaptation and resilience		
3.5.1	Proportion of annual spending on climate change adaptation and disaster risk management funded with budget support from donor partners to the government	TBD	50% of NAB-endorsed project funding is channeled through government systems	-	No data available
3.5.2	Number of climate and disaster finance funds to which Vanuatu is formally accredited	TBD	Vanuatu is accredited to at least two climate and disaster finance funds, the Adaptation Fund and the Green Climate Fund	-	No data available
3.5.3	Amount of climate and disaster finance used for community programs and activities through external support	TBD	VT10 Billion of external climate and disaster finance used for community programs and activities	-	No data available

ENV 4: Environmental Protection & Restoration (13 Indicators)

Objective: Reduce degradation and ensure rehabilitation of natural habitats.

ID	Indicator Description	Baseline	Target	Current	Status
4.1.1	Proportion of declared physical planning areas that have a physical plan	TBD	100% of all physical planning areas declared in or before 2016 have a physical plan in place	-	No data available
4.1.2	Proportion of directives of the national land use planning policy implemented	TBD	50% of the directives to be implemented by 2025	-	No data available
4.2.1	Number of declared Water Protection Zones	TBD	6 Water Protection Zones declared	-	No data available

4.2.2	Establishment of GIS mapping relevant to the management of forest activities	Creating precise GIS forest maps integrated with Land Use Capability data.	By 2030 100% of forest areas of significance mapped	-	No data available
4.3.1	Proportion of extraction activities complying with EIA requirements	TBD	Proportion of extraction activities complying with EIA requirements	-	No data available
4.4.1	Vanuatu's adherence rate to international regional fisheries regulations.	Based on Fisheries Business Plan	80% compliance of national fishing fleet	-	No data available
4.4.2	The number of active and implemented coastal management plans across Vanuatu.	TBD	40 integrated coastal management plans developed and operational	-	No data available
4.5.1	Total number of approved Fisheries Management Plans for designated fisheries	Based on Fisheries Business Plan	20 approved Fisheries Management Plans for designated Fisheries	-	No data available
4.5.2	Number of commercial sand mines	TBD	By 2025, there is a ban on commercial coastal sand mining in 6 sites	-	No data available
4.5.3	Number of places where detailed geo-scientific information has been collected	TBD	100%	-	No data available
4.6.1	Annual estimated area (square km) of reforestation and rehabilitation	Planning and Mapping Unit database, presented in Annual Reports	20,000 ha of planted forests by 2020	-	No data available
4.6.2	Proportion of licensees harvesting within their allocated quota or Proportion of licensee	□ Deforestation considered in REDD+ project currently in Preparation phase.	80% compliance of licensees with maximum allowable quota or 75% of forestry licensee operations being	-	No data available

	operations being monitored	□ 2018 outcomes of studies will guide Implementation and will then be able to consider indicators/targets	monitored to ensure compliance with quotas		
4.7.1	Total annual outreach and awareness activities undertaken by or in partnership with the DEPC	Baseline 2016 – 2 offices (SHEFA, SANMA) DEPC AR	By 2030 6 provincial offices established	10	Excellent Progress

ENV 5: Waste Management & Pollution Control (9 Indicators)

Objective: Minimize environmental impact of waste and chemicals through improved governance and public awareness.

ID	Indicator Description	Baseline	Target	Current	Status
5.1.1	Proportion of NBSAP and NISSAP targets met	Baseline: DEPC has one environmental guideline in place for development activities (guide to completing application form)	At least 90% of the activities in the NISSAP are implemented	-	No data available
5.1.2	Total number of environmental guidelines in place	TBD	6 environmental guidelines in place	5	Medium progress
5.2.1	Total number of registered CCAs	TBD	10 registered CCAs in Vanuatu	-	No data available
5.2.2	Proportion of community management committees implementing their CCA management plan	TBD	By 2030 100%	-	No data available
5.3.1	Proportion of population with knowledge of the names of local flora and fauna	TBD	By 2020 a baseline of the current understanding of traditional knowledge and practices is established	-	No data available

5.3.2	Number of threatened species legally protected	IUCN Red List has 138 species. Of this 138, 13 are legally protected (excluding CITES)	All threatened species identified on the IUCN Red List are protected by national legislation	13	No progress
5.4.1	Proportion of incoming planes and sea vessels cleared through Biosecurity annually	□ Biosecurity/also need info re total number of flights □ Biosecurity/also need info re total number of ship arrivals	100% of international flight arrivals and 70% of international sea craft arrivals cleared by Biosecurity Vanuatu annually	-	No data available
5.5.1	Number of model schools implementing environmental programs	TBD	At least one school in each province is an environment model school and environment ambassador	-	No data available
5.6.1	Proportion of government agencies using a central information sharing system for environment data	No central information sharing system for environment data. UNDP/GEF funded project focusing on this has commenced	1 central information sharing system for environment data is established	-	No data available

Critical Observations

1. **Baseline Reliance:** Most "Current" values still reflect the original baseline data from several years ago.
2. **Reporting Silos:** Several indicators (like ENV 4.7.1) have active government activity, but the progress is not being reflected in the NSDP tracking portal.
3. **Verification Obstacles:** Links provided for verification currently lead to pages with no data.
